

## Chapter – 65

## Miracles

(معجزات)

❖ سُنَّةَ اللَّهِ الَّتِي قَدْ خَلَتْ مِنْ قَبْلُ وَلَنْ تَجِدَ لِسُنَّةِ اللَّهِ تَبْدِيلًا -

*This is the tradition (law of God), effective as before, and you will not find any change in this law of God. (48:23)*

❖ افْتَرَبَتِ السَّاعَةُ وَانْشَقَّ الْقَمَرُ -

*The Hour of reappearance came near, and the moon split apart. (54:01)*

Dear People! All the prophets were sent for the specific nations, specific countries and the specific periods; therefore their miracles were also restricted for those ages. As such those miracles are at present almost vanished.

The religion of Muhammad صلى الله عليه وسلم is now implemented permanently. He is the last of all Prophets (خاتم النبيين). There will be no more Prophet to come. His religion will remain till last day.

Thousands of miracles appeared through the Noble Prophet. When he put his hand in a pot of water, the water started boiling. This is actually doing from 'nothing' to 'something'. He took out milk from a totally dry udder of a female goat. This is also doing from 'nothing' to 'something'. When he hugged a disbeliever, that fellow became Muslim. This is sort of giving 'life' to a 'dead'.

But above all, his greatest, superb and a permanent miracle is Quran. The experts of literature consider that, Quran is a miracle as it is eloquent and penetrating. Politicians consider Quran is a miracle as it has created its own 'Political System'. --- Some say that giving the

predictions and telling about hidden things (غيب) is a miracle of Quran. Some say that the ‘Safety of Quran’ is a miracle. Some say that its melody that penetrates everybody’s hearts is a miracle. ---- And I say those who are the specialists of particular subject would think over Quran, it will appear for each of them entirely different, and it is a real miracle.

Dear People! A few persons went to the Prophet and told, “Your magic is effective on this earth only, but it will not work on sky. If you are a real Prophet then split this moon in pieces.” He signaled, and the moon divided into two pieces. ---- On this topic following questions may come up:

- Is it possible that moon can be divided?  
The recent research given by astronomy says that some parts of Sun separated and became individual spheres like: Mercury, Venus, and Earth etc. Then a part from Earth came out and Moon has formed. With these planets, many moons also exist. Those who believe on God, the ‘Split of Moon’ is not a new thing nor it is beyond imagination.
- Does this ‘Split of Moon’ have ever narrated by somebody?  
This miracle happened in the night time. Most of the people were sleeping but those who were awakened they saw this happening and they have narrated as well.
- Whether this event of ‘Split of Moon’ is a miracle of Noble Prophet or it is indicative of Resurrection (القيامة)?  
Since this division of moon took place by the signal of Muhammad صلى الله عليه وسلم, therefore it is his miracle. Secondly, this event took place near the day of Resurrection/Judgment therefore it is also indicative of Resurrection.
- Whether one thing simultaneously be a miracle as well as Resurrection?  
Yes! Of course, becoming of Muhammad صلى الله عليه وسلم as a Prophet itself is an indication of Resurrection (He is خاتم النبيين).

Dear people! We believe that when Prophet prays and wishes for something then God takes action out of the way. This act is usually considered as a miracle of the Prophet. Just tell us! Whether this thing is different from your imagination or unlike of God’s habit? In fact, when you give up then God shows the power of nature. This is God’s natural disposition. This is Miracle. This is Charisma. This is the habit of God. This is his Nature.

We, the religious people, believe in Miracles. We have faith in God's Nature.

فَاتَّبَعَهُمْ فِرْعَوْنُ بِجُنُودِهِ فَغَشِيَهُمْ مِّنَ الْيَمِّ مَا غَشِيَهُمْ

{So Firaun went after them (Moosa and his people) with his army, and the sea enveloped them, the way it did. (20:78)}

When Moosa عليه السلام wanted to pass the Gulf of Suez, at that time, the water flow stopped in the canal by miracle, till Prophet Moosa and Bani Israel passed out, and when Firaun and his army entered into Suez to chase Moosa, the water flow rushed over them and all of them submerged.

Some people who do not believe in miracles they say that actually when Prophet Moosa passed the Gulf of Suez, there was low tide and the canal bottom was dry. And when Firaun chased, that time the canal was in high tide, therefore Firaun and his army submerged. The interesting part of this logic is; Moosa عليه السلام and Bani Israel were the people of Kinaan (Palestine) and they were knowing all the history of low and high tide in Suez, whereas Firaun and his people who were the resident just at the Suez coast of Bahr-el-Qulzum and they were not aware about the pattern of tides ---! Dear people! It is all lust, materialism, and nothing else.

O Mindless People! After seeing the advancements of science and new technology, you are so much impressed that you are now refuting miracles! By knowing some principles of material sciences, you claim that you know all the laws of Nature, it is not correct. --- How much you have seen about the Laws of Nature? What is the date of origin of this world? And how much history of this world is known to you? Do you know how many events are mentioned in the history of this world and how much are left unreported?

There is an epidemic all over. There is a wrong verdict that is being accepted by these ignorant people. What is that ---? That, “*thing which is not known to us does not exist at all.*” Such foolish thoughts are the main hurdles in the enhancement of knowledge. The new disclosures are only possible when it is said that ‘*we have very less knowledge*’. Those things which are not known should be learned with struggle. Those things which are known that also have many errors. From the beginning till today, the science has changed many colors. Lot of research was there. Lot of advancement was also there. Due to your foolish thoughts, would there be repulsion for any new things, then

there would have been no advancement at all. ---- Keep always this Quranic Verse under consideration:

وَمَا أُوتِيتُمْ مِّنَ الْعِلْمِ إِلَّا قَلِيلًا

{And the knowledge has been given but very little. (17:85)}

For such ill-informed people, there are few illustrations:

- There was one earthen pot filled with water. Just near it one frog was sitting and shouting “there is no water anywhere except this water”.
- A four year old child who had always seen the sun rising and setting and he never saw the Solar Eclipse. Somebody said to him about Solar Eclipse. He responded with these words. “How people are wrong; they say that sun becomes dark for a limited time, and for that they say it is Solar Eclipse!” And he laughs at you.

But, you see! Would you not laugh at his laugh? Human Being is ill-informed. He restricts God’s Nature. He keeps himself away from correct knowledge! وَ قُلْ رَبِّ زِدْنِي عِلْمًا .

One more thing to be remembered:

Those persons who act against their habits, who do not eat much, who sleep less, who do not go here and there unnecessarily, and who do not talk superfluously, God shows some magical things through them. If you do against your nature, accordingly God would also do for you against His routine.

You do not do anything different to your nature then why God would do for you against His routine? Everyone may be bestowed abnormally provided his acts are different to the nature. ‘Action’ and ‘Reaction’ always remain proportional.

-----
